

# Conditional Text Box for Radio Button Polls

Last Updated - March 27, 2025

*Note: This custom code is offered with no support from Pendo Customer Support.*

**Step 1:** Create a guide that contains a radio button poll, an open text poll, and a custom code block. The open text poll is intended to be hidden until a particular multiple choice poll option has been selected by the user.

**Step 2:** In one of the multiple choice poll questions in your guide, add the tag “[showHidden]” next to the text you’d like to be shown for that question. Above the open text poll question title that you’d like to be conditionally rendered, add the “[hidden]” tag.

### CUSTOM CODE: CONDITIONAL TEXT POLL

This code snippet will allow you to render an open text poll, conditionally upon a particular value being selected for an open text poll.

---

What is your role?

☐ Product Manager

☐ Designer

☐ Developer

☐ Other [showHidden]

[Submit](#)

[hidden] If none of the above, what is your role?

Enter text here

**Step 3:** Paste [this JavaScript](#) into the JavaScript tab within a custom code block module of the guide step from Step 1.

**Step 4:** Preview your guide step. Any behavioral tags that you've added to the guide will disappear when the guide is previewed or live.

When selecting the radio button poll choice that had the [showHidden] tag, your hidden open text poll choice will appear. Selecting any other option will cause the open text poll to disappear:
