# Showing a Guide on a Time-Based Delay

Last Updated: March 27, 2025
*Note: This custom code is offered with no support from Pendo Customer Support.*

Step 1: Create a new guide that contains a custom code block. The guide can otherwise contain any other building blocks and any number of steps.

Step 2: Enter this code into the JavaScript tab within a new custom code building block.

Step 3: Click on the border of the guide step's container to access Container Settings. Under the Accessibility section, enter in "{delay: x}" where x is the number of seconds that you would like the guide step to wait before rendering (ie, {delay: 3} would make the guide delay for 3 seconds).

Step 4: Preview your guide normally. This functionality should work as expected in both preview and when the guide pushed live.
