

Thumbs Up / Thumbs Down Polls

Last Updated: October 7, 2026

Note: This custom code is offered with no support from Pendo Customer Support.

Step 1: Create a new guide that contains a “Yes/No” Poll, as well as a custom code block. The guide can otherwise contain any other building blocks and any number of steps. The thumbs icons are drawn as inline SVG, so no hosted images are needed. This version supports one Yes/No poll per guide step.

CUSTOM CODE: THUMBS UP & DOWN POLLS

Analytics will still be recorded as "yes" and "no".

Was this guide helpful?

Step 2: Add the code to the custom code building block. Paste each file from the [snippets repository](#) into the matching tab:

- thumbsUpDownPoll.html into the **HTML** tab
- thumbsUpDownPoll.css into the **CSS** tab
- thumbsUpDownPoll.js into the **JavaScript** tab

Step 3: The Yes/No buttons are replaced by green “Thumbs Up” and red “Thumbs Down” icons. Clicking an icon clicks the matching native button, so in Pendo Guide Metrics the results still show as “Yes” or “No”.

How it works

The HTML adds two buttons containing inline SVG icons, hidden until ready. The JavaScript finds the guide’s native “Yes” and “No” buttons, hides them, and forwards each icon click to the matching native button. The icons are only revealed once this is wired up, so the native buttons never flash on screen.

Customizing

What	How
Icon colours	Change the fill on each <code><path></code> in the HTML (#2E7D32 green, #C62828 red).
Icon size	Change width / height on each <code><svg></code> .
Spacing	Change gap in <code>.thumbs-poll</code> in the CSS.
Button labels	If the poll buttons are not labelled "Yes" and "No", update <code>findNative('yes')</code> and <code>findNative('no')</code> in the JavaScript.
Other icons	Replace the <code><path d="..."></code> with any 24x24 SVG path.

Troubleshooting

Symptom	Fix
Thumbs never appear	Open the browser console. If it shows <code>[thumbs-poll] gave up; native buttons not found</code> , update the button labels in <code>findNative</code> .
Clicking a thumb does nothing	The guide may have re-rendered. Re-query the native button inside the click handlers.
